## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-8, 12-15 and 21-22 are allowed. The following is an examiner's statement of reasons for allowance:

With respect to claims 1-8, 12-15 Bonaccio teaches a signal bounce inhibiting device (Fig. 1 or 2) for preventing from power/ground bounce, comprising: an electric level recovering circuit (Fig. 2 item 25 and Fig. 1 90 and 91) receiving said first output signal, and recovering said first output signal into said first internal signal required by a second chip (Fig. 2 item 11) in response to a first recovering control signal inputted therein. While Bonaccio teaches a toggling circuit item 24 Bonaccio does not teach the changing the first internal signal with a first electronic level to an output signal with a second electric level. At least this further limitation to claims 1 and 12 are not taught or rendered obvious by the prior art.

With respect to claim 21-22 Bonaccio teaches a signal bounce inhibiting device Bonaccio does not teach the step of recovering a plurality of internal signals by changing said toggling control signals in response to and recovery control signals. At least this further limitation to claim 21 is not taught or rendered obvious by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

Applicant's arguments, filed January 23, 2006 with respect to claims 1-8, 12-15 and 21-22 have been fully considered and are persuasive. The previous rejection has been withdrawn.

Applicant's amendment to the specification is hereby entered and the previous objection has been withdrawn.
